Application/Control Number: 10/552,203 Page 2

Art Unit: 3744

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 1. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,182,922 to Allread et al in view of U.S. Patent No. 6,969,094 to Frohling et al. Allread et al discloses the claimed invention except for the couplings being made entirely of metallic substance. Frohling et al teaches pipe couplings that are made entirely of metallic substance, including the seals 13. See especially column 2, lines 55-63, where it is taught that the sealing ring 13 is made of a soft metal. Thus, it would be obvious to modify Allread et al so that the seal rings 36-39 are made of a metallic substance, in view of Frohling et al, to yield the predictable result that the couplings including the seals are made of a material that will not readily wear out.
- 2. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Allread et al in view of U.S. Patent No. 5,174,612 to Schnell. Allread et al discloses the claimed invention except for the couplings being made entirely of a metallic substance. Schnell teaches that it is old to make couplings or clamps entirely of a metallic substance. See, for example, column 6, lines 7-20, where it is stated that the entire clamp is fabricated of metal such as aluminum or steel or specialized alloys. Thus, it would be obvious to modify Allread et al so that the entire couplings are made of metallic substance, in view of Schnell, to yield the predictable result that the couplings including the seals are made of a material that will not readily wear out.

Application/Control Number: 10/552,203

Art Unit: 3744

3. Applicant's arguments filed December 23, 2008 have been fully considered but they are not persuasive. In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971). In this case, all-metal couplings per se are well known for use in fluid systems for a variety of reasons. No patentable invention is seen in the mere recitation of the ducting being made entirely of a metallic substance, including the couplings.

Page 3

- 4. Allread et al clearly discloses the ducting having at least two curves or bends (e.g. 65). The recitation of the curves being for damping and geometry is considered to be a mere functional recitation and not a positive structural limitation. The dimensions of the curves is also considered to be a matter of obvious design choice to one of ordinary skill in the art.
- 5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William E. Tapolcai whose telephone number is (571) 272-4814. The examiner can normally be reached on Mon. - Thurs., 6:30 to 5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl J. Tyler can be reached on (571) 272-4834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
